July 14, 2020

Hello Clayton Families,

Over the past month, Polk County School Districts have been working together to provide a framework to open schools in the fall of 2020. The framework includes guidance from a variety of sources including, the Department of Public Instruction, the Wisconsin Department of Health Services, the Center for Disease Control and Prevention, the Polk County Health Department, and the Wisconsin Interscholastic Athletic Association. The safety of students, staff, and the community is our top priority.

The plan includes open communication and collaboration between the school district and local public health. Of course, our plan cannot possibly address every scenario that the Covid-19 pandemic might produce. Real-time issues and decisions that are not identified in this plan will be addressed with additional guidance from our partner agencies.

Even though all of our plans will have the foundation of similar practices, each School District may need to make modifications to the countywide practices and protocols, based on local circumstances, to keep local students, staff, and the community as safe as possible within the larger system.

Our plan, Onward Clayton!, will be rolled out to the families next Tuesday, July 21st. As always if you have any questions for me, please feel free to call or email.
Have a Great Day!

Respectfully,

Ed Cerney,
District Administrator
Clayton School District
